Correction to: Psychological Injury and Law

<https://doi.org/10.1007/s12207-019-09367-5>

Correction of mistake in the original version of this paper, “Types of Malingering in PTSD: Evidence from a Psychological Injury Paradigm,” specifically, in Table 3, the *p* values should read “0.000***” for the TSI-2 ATR and “0.021*” for the SIMS, and not the reverse. Additionally, contrary to the original version in which it states condition “was not controlled,” the effects of instructional condition were accounted for by using pooled-within groups correlational analyses.

The sentence “As such, instructional condition **was not** controlled in subsequent analyses by means of pooled-within groups correlational analyses.” In the Results section should read “As such, instructional condition **was** controlled in subsequent analyses by means of pooled-within groups correlational analyses.”.

In Table 3. Analysis of Variance for Continuous Outcome Scores by Condition, the *p* value for TSI-2 ATR reads “0.021*” should read “0.000***”. The *p* value for SIMS reads “0.000***” should read “0.021*”.

The corrected Table 3 is given.

The original article can be found online at <https://doi.org/10.1007/s12207-019-09367-5>.
