Correction to: Journal of Pharmaceutical Innovation

<https://doi.org/10.1007/s12247-020-09521-6>

The original version of this article unfortunately contained a mistake. The equation under the Thickness and Mechanical Properties of the Dressing section was captured incorrectly. Below is the correct equation for that section:

$$\text{Tensile strength (N/mm}^2\text{)} = \text{Force at break (N)} / \text{Initial cross sectional area (mm}^2\text{)}$$
$$\%E = (\text{Extension of length at rupture} / \text{Initial length}) \times 100$$

The original article has been corrected.
