It was a privilege to go through the “Memoirs of a Surgeon,” by an eminent surgeon and mentor to many of his students.

The book is a compendium of information, not only of contemporary surgical world but how it related to an illustrious career of a surgeon of repute, an eminent teacher, and a loving family person with artistic interests. They would not only point to the versatility of his person but serve as a great lesson and an eye-opener to time management, in a busy professional career.

The narrative is unique, very effectively using others’ comments to substantiate the landmarks in his illustrious journey

through life, academic and personal, one that is really inspiring and would serve as a role model for the resident world.

The description is indeed so picturesque that it is as good as watching a good biopic. The picture quality is superb. The language is simple, crisp, and quite characteristic of his scientific precision.

The book is in four colors, hard bound, and nicely printed on good art paper.

All in all, it is a valuable biography of an eminent surgeon and should serve as a guiding force to many a young budding surgeon.
