

Erratum to: Geology, geochemistry, mineralogy of Phayaung Taung, Patheingyi Township, Mandalay Division, Myanmar

Naing Aung Khant^{1,2}, Adam Piestrzynski², and Chungwan Lim^{1*}

¹Department of Earth Science Education, Kongju National University, 56 Kongju-Daehak-Ro, Kongju, Chungnam 32588, Republic of Korea

²Faculty of Geology, Geophysics and Environmental Protection, AGH University of Science and Technology, Krakow 30-059, Poland

Erratum to: Geosciences Journal, 2021, 25, 145–156, DOI 10.1007/s12303-020-0019-6

In the original article mentioned above, there were errors on marking appropriate citations of the unpublished papers as follows:

1. The caption of the geological map (Fig. 1) is corrected to “Fig. 1. Geological map of the study area (Modified after Soe, 2009; Zaw, 2018).”
2. The caption of the Table 1 is correct to “Table 1. Gold mineralization of the Phayaung Taung area (Modified after Zaw, 2018)”
3. Page 2, right column, second paragraph, “In the central and eastern part, rock units are well exposed but in high relief and rugged terrain with big trees (e.g., Ingyin, Shar Htanaung, Bamboo, etc.)” is corrected to “In the central and eastern part, rock units are well exposed but in high relief and rugged terrain with big trees (e.g., Ingyin, Shar Htanaung, Bamboo, etc.) (Zaw, 2018).”
4. Page 2, right column, third paragraph, “It typically develops in the metapelites of staurolite zones and includes rocks that belong to the middle amphibolite facies.” is corrected to “It typically develops in the metapelites of staurolite zones and includes rocks that belong to the middle amphibolite facies (Zaw, 2018).”

5. Page 11, left column, first paragraph, “There were four rock units of the Chaung Magyi Group, which are in ascending order: Nyaung Chaung Chloritic Phyllite, Kin Sandy Phyllite, Graphitic-garnet-staurolite-biotite Schists, and Maukkaw Quartzite.” is corrected to “There were four rock units of the Chaung Magyi Group, which are in ascending order: Nyaung Chaung Chloritic Phyllite, Kin Sandy Phyllite, Graphitic-garnet-staurolite-biotite Schists, and Maukkaw Quartzite (Zaw, 2018).”
