Two unrelated tables have interfered with our article. There are two Table 1 and Table 2 in the original publication. We request readers to disregard “Table 1. General characteristics of the subjects by sex” and age and “Table 2. Parameters of the ROC analysis for the diagnostic performance of SPPB in identifying high risk for frailty phenotype and geriatric syndromes for community-dwelling older adults by sex”. The

correct Table 1 and Table 2 is found in the manuscript as “Table 1. Baseline demographic and clinical characteristics of the hospitalized Covid-19 patients stratified by age” and “Table 2. Laboratory and radiological findings of the hospitalized Covid-19 patients at hospital admission stratified by age. We apologize to the readers for this error on proof stage ”
