Erratum to: Can J Anesth/J Can Anesth (2015) 62: 1000–1016 DOI 10.1007/s12630-015-0423-y

In the article entitled: “Managing the challenging pediatric airway: Continuing Professional Development” published in the September 2015 issue, Can J Anesth 2015; DOI: 10.1007/s12630-015-0423-y, the Electronic Supplementary Material (ESM) was incorrect. The ESM should be as follows:

Electronic Supplementary Material

Video 1: Technique of proper jaw thrust in a child (see MOESM1). Forward thrust must be applied at the head (and not the angle) of the mandible. This keeps the child's mouth in a more open position and pulls the tongue away from the hard and soft palates.

Video 2: Technique of video laryngoscope intubation in children (see MOESM2).

Video 3: Technique of video laryngoscope-assisted fibrescope intubation in children (see MOESM3).

Video 4: Technique of flexible fibrescope positioning in an infant mannequin (see MOESM4).

Video 5: Technique of flexible fibrescope positioning in a child (see MOESM5).

APPENDIX 1: The unanticipated difficult intubation algorithm (see MOESM6), The Association of Paediatric Anaesthetists of Great Britain and Ireland. Paediatric Difficult Airway Guidelines, 2012.

APPENDIX 2: The paediatric can't intubate can't ventilate algorithm (see MOESM7), The Association of Paediatric Anaesthetists of Great Britain and Ireland. Paediatric Difficult Airway Guidelines, 2012.

The publisher apologizes most sincerely for this technical error.

The online version of the original article can be found under doi:[10.1007/s12630-015-0423-y](https://doi.org/10.1007/s12630-015-0423-y).

Electronic supplementary material The online version of this article (doi:[10.1007/s12630-015-0504-y](https://doi.org/10.1007/s12630-015-0504-y)) contains supplementary material, which is available to authorized users.
