Erratum to: BioNanoScience DOI 10.1007/s12668-016-0201-5

The original version of this article unfortunately contained a mistake. The Acknowledgments section in the original publication of “Luminescence monitoring of temporal changes and efficiency of tissue optical clearing by NIR-excited upconversion particles” (Kozintseva MD, Volkova EK, Konyukhova JG, Zabenkov IV, Kochubey VI; 2016; doi: [10.1007/s12668-016-0201-5](https://doi.org/10.1007/s12668-016-0201-5)) should correspond to the following item:

“**Acknowledgments** This research was supported in part in the field of the performance of the measurements of tissue

clearing by the grant no. 14-15-00186 from the Russian Science Foundation and in the field of the simulation of the experiments by RF Government contract no. 2014/203, Research no. 1490 “Development of optical methods and instrumentation for measurements and control of structure and dynamics of biological media.” The authors grateful to Dr. A.P. Popov (Opto-Electronics and Measurement Techniques Laboratory, University of Oulu, Finland) for kindly providing Y₂O₃:Yb, Er upconversion particles and their spectral characteristics (Figure 1), and to Prof V.V. Tuchin (Saratov State University, Russia) for fruitful discussions.”
