Correction to: Mindfulness (2017) 8:664–676
<https://doi.org/10.1007/s12671-016-0645-2>

Page 669

In the sixth paragraph of the Results section (lines 2 and 4), indirect to direct should be indirect to total.

Page 671

In Table 3, Indirect to direct effects ratio should be Indirect to total effects ratio.

Page 671

In Table 3, for the PWB total score as dependent variable, the point estimate and the confidence intervals of the indirect effect of neuroticism through describing should be -0.07 ($-0.14, -0.03$).

These errors were typos and do not affect the results presented in the study.

Note. Point estimates are unstandardized regression coefficients based on bias-corrected bootstrap confidence interval after 10,000 bootstrap resamplings. Point estimates in bold are significant because the confidence intervals are entirely above or entirely below zero.

SHS = Subjective Happiness Scale; SWLS = Satisfaction with Life Scale; PWB = Psychological well-being. Lower and upper limits of the bootstrap confidence intervals are in parenthesis
