In agreement with the Endocrine Society, I am pleased to announce the new Associate Editors of *Hormones & Cancer*, Dr. Benita S. Katzenellebogen, from University of Indiana and Dr. Hsing-Jien Kung, from University of California Davis Cancer Center. Dr. Katzenellebogen is renowned for her work in sex steroid receptors, anti-estrogens, and breast cancer. Dr. Kung is equally distinguished for his work in androgen receptor, tyrosine kinases, and prostate cancer. We warmly welcome them to *Hormones & Cancer*.

We invite and welcome submissions from clinical investigators on topical and interesting case histories related

to *Hormones & Cancer* as short communications. From all investigators submitting manuscripts to this journal, we are also soliciting a figure from their manuscript to serve as a cover for a journal issue. The figure should be uniquely interesting and preferentially in color. Selection will be made on a competitive basis.

The focus of this issue is on basic, translational, and clinical aspects of breast cancer presented at the Sixth International Symposium on Hormonal Oncogenesis, Tokyo, Japan, 2010. The Symposium Executive and Scientific Advisory Board members are shown below (Fig. 1).
