The authors of the above mentioned article wish to thank the institutes and their colleagues who supported this work in the following acknowledgment:

This work was supported by grants No. 143030B (to ERI), No. 145073 (to VT) and No. 145003 (to VS) funded by the Ministry of Science, Republic of Serbia. We would like to thank to Prof. V. Starcevic for her expertise in neuroendocrine ghrelin actions.

We thank Drs. D. Stevanovic, D. Nesic and M. Djelic for their excellent contribution in *in vivo* experimental design, and we would like also to stress out that we are grateful to them for their performances of stereotaxically intracerebroventricular implantation of cannulas, ICV ghrelin treatment for 5 days as well as for their great help with animal sacrifices, collecting blood samples, organs' excision and weighing, and help in writing 'Materials and Methods' section related to *in vivo* part of the experiments.
