Correction to: Organic Agriculture

<https://doi.org/10.1007/s13165-019-00262-6>

The original version of this article unfortunately contained layout errors in Figure 5.

The correct figure is shown below.

Fig. 5 Comparison of weed diversity between plowed plots (a) and reduced tillage (b) using Shannon index for diversity (H') and evenness (E) and Simpson's index for dominance (D) calculated using biomass values for a total number of observed weed species

(S). Biomass shares of the 16 most abundant species in spring wheat in 2017 are presented. EPPO codes for weed species available at: <https://gd.eppo.int/>

The online version of the original article can be found at <https://doi.org/10.1007/s13165-019-00262-6>

The original article has been corrected.
