**Erratum to: Ann Microbiol**  
**DOI 10.1007/s13213-015-1188-9**

“In the legend of figure 3 of this article, «superoxide anion radical» was replaced by «hydrogen peroxide».

The correct figure legend reads as follows:

Intensity of hydrogen peroxide generation (measured with lucigenin-inactivated CL) upon incubation of oil-biodegrading microorganisms within 30 days in basic mineral salt medium with addition of yeast extract or various hydrocarbons as a carbon source: Control - yeast extract and tryptone; Diesel - diesel fuel. CL with other hydrocarbons was lower than the control and is not shown in the figure. a - *A. calcoaceticus* EMBM-06 b - *A. calcoaceticus* VKPM B-10353. Differences from the control for all the data sets are statistically significant ( $p < 0.05$ )”
