Correction to: Diabetes Ther (2024) 15:145–154 https://doi.org/10.1007/s13300-023-01489-z

In this article, the text 'IDegLira can be prescribed in T2D alone or in combination with other oral anti-hyperglycemic agents or in combination with short-acting insulin when glycemic control is poor' should have read 'IDegLira can be prescribed in T2D as an adjunct to diet and exercise in addition to other oral medicinal products for the treatment of diabetes. IDegLira is indicated in the transfer from any prior insulin regimen that includes a basal insulin component (including multi-injection regimens)'. The original article has been corrected.
