Citation: Wang, L. C., X. G. Sun, X. Q. Yang, et al., 2021: Erratum. *J. Meteor. Res.*, **35**(6), 1148–1148, doi: 10.1007/s13351-021-1999-5.

This erratum is to report a figure misplacement in Wang et al. (2021) entitled “Contribution of Water Vapor to the Record-Breaking Extreme Meiyu Rainfall along the Yangtze River Valley in 2020.” In Wang et al. (2021), Fig. 2b should be switched with Fig. 2d (note that the labels on top of Figs. 2b and 2d need not change). The correct figure as a whole is given here (Fig. 2).

This is an error in figure format; it does not affect in any way the analysis and conclusion of the original paper.

Wang, L. C., X. G. Sun, X. Q. Yang, et al., 2021: Contribution of water vapor to the record-breaking extreme Meiyu rainfall along the Yangtze River valley in 2020. *J. Meteor. Res.*, **35**, 557–570, doi: 10.1007/s13351-021-1030-1.

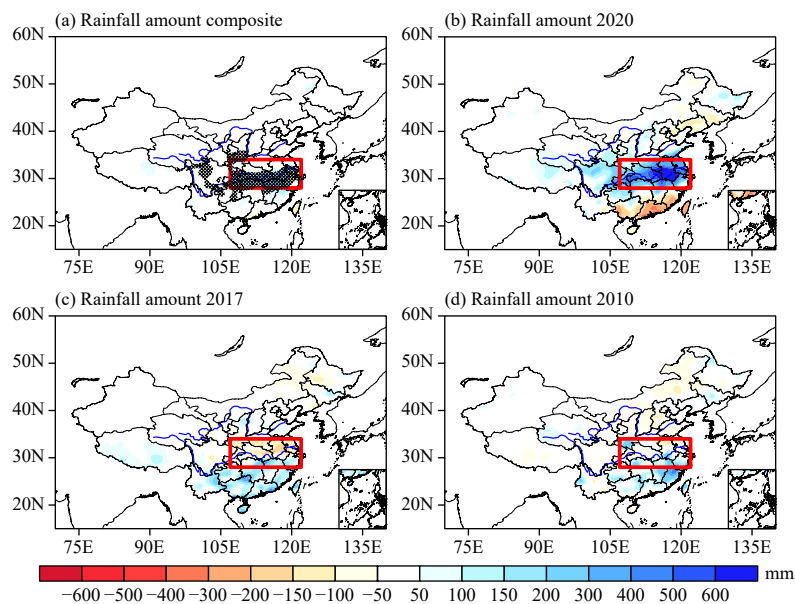

Fig. 2. Spatial distributions of anomalous Meiyu rainfall amount (mm) in (a) the composite based on the years of 1980, 1983, 1998, 1999, 2010, and 2016, (b) 2020, (c) 2017, and (d) 2010. The YRV region bounded by 27° – 34° N, 107° – 122° E is marked by a red rectangle, and the crosses in (a) denote values at the 95% confidence level of the Student’s *t*-test.
