Identified SNPs were named by the authors by taking 'rs', chromosome number and chromosomal basepair location.

Two SNPs were newly found and are not included in dbSNP database (The NCBI Short Genetic Variations database, build 141, <http://www.ncbi.nlm.nih.gov/snp/>):
rs16170823: chromosome 16 position 170823
rsZ2494710: chromosome Z position 2494710

Other six SNPs are included in the dbSNP database but they are named differently in the paper:
