Correction to: Mammal Research

<https://doi.org/10.1007/s13364-020-00513-y>

In the original published version of this article, in the first sentence of the results, we accidentally reported the wrong number of camera trapping nights in our study. The correct sentence should be “We obtained a total of 5791 recordings during 2255 trap nights (568 trap nights in 2017 and 1687 in 2018)”. All other information (including the reported trapping rates) is correct, as we calculated trapping rates, and did all modelling, with the correct number of trap nights.

The original article has been corrected.
