<https://doi.org/10.1007/s13577-020-00393-z>

The Editor-in-Chief has retracted this article because:

- a region of Figure 4b (panel SW620 vs sh-LINC00665#1+miR-9-5p in) overlaps with a region of Figure 4c (panel SW620 vs sh-LINC00665#1+miR-9-5p in).
- all the flow cytometry plots in Figure 3F appear to display a similar data distribution pattern, even when different cell lines are used.

The Editor-in-Chief therefore no longer has confidence in the data presented.

Xuhong Zhao and Weijie Pan agree to this retraction. None of the other authors have responded to any correspondence from the editor/publisher about this retraction.

**Publisher's Note** Springer Nature remains neutral with regard to jurisdictional claims in published maps and institutional affiliations.
