The text in the original article on page 246 left hand column contains errors. The correct text is given below.

Those strains are resistant to at least one antimicrobial agent belonging to three or more classes (http://ecdc.europa.eu/en/activities/diseaseprogrammes/ARHAI/Pages/public_consultation_clinical_microbiology_infection_article.aspx). In the case of extensively drug-resistant strains (XDR), i.e., those susceptible to the maximum of two different classes, their total share was 28.06%.

The online version of the original article can be found under doi:[10.1007/s13762-016-1155-4](https://doi.org/10.1007/s13762-016-1155-4).
