Unfortunately the Code availability statement has been published incorrectly in the original version of the article.

Previously read as:

“The coding used in the model is available in ESM.”

Should read as:

“Will be made available on request.”

The Electronic Supplementary Material (ESM) containing the model code has been removed.

The original article has been corrected.

The original article can be found online at <https://doi.org/10.1007/s40258-020-00605-5>.
