

ACKNOWLEDGEMENT TO REFEREES

© Springer International Publishing AG, part of Springer Nature 2017

Dear Reader,

As we reach the final issue of *Clinical Drug Investigation* for 2017, we wish to reflect on another successful year's achievements, and to thank all those who have contributed their time and effort to guarantee the high quality of our content.

2017 was a successful year for *Clinical Drug Investigation* with publication of over 100 articles in this year's volume.

The quality of articles published in the journal is also reflected in its most recent impact factor (2016 impact factor 1.853).

Other journals in the Adis Premier Journals Portfolio (<http://www.springer.com/gp/adis>) continue to prosper, and this year has seen the successful launch of *PharmacoEconomics—Open*, the newest journal in the portfolio. The journal has published a full volume of 30 articles in its first year, plus many more online first. Following in the steps of Adis' flagship subscription journal in the field, *PharmacoEconomics*, the new open-access journal focuses on cost and health outcomes associated with drugs, devices and other healthcare interventions.

We thank the authors who have contributed articles to *Clinical Drug Investigation* over the course of 2017. The skill and dedication of all authors are critical to the continued publication of the journal. The quality of published articles is also testament to the significant efforts of the peer reviewers, whose commitment ensures that the journal's content is held to the highest possible standard. We would like to thank the following individuals who acted as reviewers for *Clinical Drug Investigation* in the last 12 months:

We do hope that you have found the articles published throughout the year in *Clinical Drug Investigation* to be interesting and informative. The editorial schedule for 2018 is well under way, and we are looking forward to bringing you many high-quality and authoritative articles over the coming year.

With best wishes,
Jasbir Singh
Editor-in-Chief
