The original version of this article unfortunately contained a mistake.

Abstract—Results: 3rd sentence, which previously read:

Of the 28 AEs, severe AEs leading to permanent D-penicillamine discontinuation occurred in 16 (57%) [never reintroduced 12 (43%), discontinued after intolerant to rechallenge, 4 (14%)], temporary cessation followed by reintroduction to initial dose 13 (46%) and continuation with reduced dose in 3 (11%) patients.

Should read:

Of the 28 AEs, severe AEs leading to permanent D-penicillamine discontinuation occurred in 16 (57%) [never reintroduced 12 (43%), discontinued after intolerant to rechallenge, 4 (14%)], temporary cessation followed by reintroduction to

initial dose 9 (32%) and continuation with reduced dose in 3 (11%) patients.

Table 1: Column 1, row 28, which previously read:

Total protein (mg/dL)

Should read:

Total protein (g/dL)

Table 1: Column 1, row 29, which previously read:

Serum albumin (mg/dL)

Should read:

Serum albumin (g/dL)

Table 3: Column 1, row 29, which previously read:

Total protein (mean $\pm$ SD) (mg/dL)

Should read:
