Dear Reader,

As we approach the end of 2016, and publish our final issue of *Clinical Pharmacokinetics* for the year, we wish to reflect on another successful year for the journal and for others in the Adis Premier journals portfolio, and to thank all who have contributed to *Clinical Pharmacokinetics* over the past 12 months.

This year *Clinical Pharmacokinetics* published 105 manuscripts, including 42 review articles, in 12 issues. The ten most popular articles published this year, based on the number of full-text downloads from Springer Link (as of October 2016), are listed below:

**Population Pharmacokinetic Modelling of Recombinant Factor IX Fc Fusion Protein (rFIXFc) in Patients with Haemophilia B**

Lei Diao, Shuanglian Li, Thomas Ludden, Jogarao Gobburu, Ivan Nestorov, Haiyan Jiang

We offer our sincere thanks to all authors who have contributed articles to *Clinical Pharmacokinetics* over the course of 2016. Their skill and dedication are critical to the continued publication of the journal.

Mid-2016 saw the release of the ISI Journal Citation Reports and the latest journal impact factors. The Impact Factor of *Clinical Pharmacokinetics* fell marginally (~4%) from 2014 to 4.829, and the journal is currently ranked 26 of 253 journals in the 'Pharmacology & Pharmacy' category. The majority of our other journals saw a rise in impact factor against the previous year. Most notably, five of our journals saw an increase of over 10% in impact factor—*The Patient* (17.08%), *Clinical Drug Investigation* (15.99%), the *American Journal of Clinical Dermatology* (13.17%), *Drug Safety* (13.52%), and *Drugs* (12.43%).

Another important milestone was reached for our recently launched open access journals, *Drug Safety—Case Reports* and *Drugs—Real World Outcomes*. Content from these journals is now available on PubMed Central.

The Adis journals portfolio will expand in 2017, with the launch of *PharmacoEconomics—Open*. This new journal will be fully open access and will focus on the publication of applied research on the economic implications and health outcomes associated with drugs, devices and other healthcare interventions. It joins our other well respected health outcomes publications, *PharmacoEconomics*, *Applied Health Economics and Health Policy*, and *The Patient: Patient-Centered Outcomes Research*.

The quality of published articles is, similarly, testament to the significant efforts of the peer reviewers, whose commitment ensures that the journal's content is held to the highest possible standard. We would like to thank the following individuals who acted as reviewers for *Clinical Pharmacokinetics* in the last 12 months:

We hope that you have found the articles published throughout 2016 to be both interesting and informative. We have appreciated the high quality of content contributed to the journal this year and we look forward to keeping you up to date with topical issues in the field of clinical pharmacokinetics in 2017.

With best wishes,

Amitabh Prakash and Anton van Rensburg
