ACKNOWLEDGEMENT TO REFEREES

Dear Reader,

As we publish the final issue of *CNS Drugs* for 2022, I wish to reflect on this year's achievements and thank all those who have contributed their valuable time and effort to ensure the quality of the content published in the journal.

The Section Editors and I would like to begin by thanking the authors who have contributed articles to *CNS Drugs* over the course of 2022, particularly as the COVID-19 pandemic has continued to present a number of challenges. The skill and dedication of these experts is critical to the continued success of the journal.

The high quality of content published in CNS Drugs has been reflected in the most recent Impact Factor of 6.497 and CiteScore of 9.8. The Impact Factor places the journal in the top quartile of the Clinical Neurology, Psychiatry, and Pharmacology and Pharmacy categories.

Through the efforts of our authors and reviewers, we also continue to see great gains in article usage. The most popular 2022 articles to date, in terms of downloads from SpringerLink, are:

- The Potential of N-Acetyl-L-Cysteine (NAC) in the Treatment of Psychiatric Disorders
- A Practical Guide to the Treatment of Dravet Syndrome with Anti-Seizure Medication
- Cannabis-Based Medicines and Medical Cannabis for Chronic Neuropathic Pain
- Molecular Mechanisms of Psilocybin and Implications for the Treatment of Depression
- Multiple Sclerosis in Children: Differential Diagnosis, Prognosis, and Disease-Modifying Treatment
- Potential Role of Curcumin for the Treatment of Major Depressive Disorder
- Post-COVID-19 Depressive Symptoms: Epidemiology, Pathophysiology, and Pharmacological Treatment
- Non-parenteral Ketamine for Depression: A Practical Discussion on Addiction Potential and Recommendations for Judicious Prescribing
- New Oral Drugs for Migraine
- A Guideline and Checklist for Initiating and Managing Clozapine Treatment in Patients with Treatment-Resistant Schizophrenia

Social media sharing and other online mentions of information are additional metrics with which to measure the reach of articles. This year the following articles published in *CNS Drugs* in the past 12 months have scored well on the Altmetric system:

- Time to Onset of Response to Pitolisant for the Treatment of Excessive Daytime Sleepiness and Cataplexy in Patients With Narcolepsy: An Analysis of Randomized, Placebo-Controlled Trials
- Antiseizure Drugs and Movement Disorders
- Effect of FT218, a Once-Nightly Sodium Oxybate Formulation, on Disrupted Nighttime Sleep in Patients with Narcolepsy: Results from the Randomized Phase III REST-ON Trial
- Potential Role of Curcumin for the Treatment of Major Depressive Disorder
- Post-COVID-19 Depressive Symptoms: Epidemiology, Pathophysiology, and Pharmacological Treatment

The quality of published articles is also testament to the significant efforts of the peer reviewers, whose commitment ensures that the journal's content is held to the highest possible standard. We would therefore like to thank the following individuals who acted as reviewers for *CNS Drugs* in the last 12 months:

Hesham Abboud, USA
Yolanda Aladro, Spain
Georgina Arrambide, Spain

Finally, I would like to take this opportunity to thank the founding Editor of the journal, Katharine Palmer, for all of her many and varied contributions to the success of CNS Drugs. It's through Kate's dedication, attention to detail, knowledge and persistence that the journal has flourished and we wish her all the very best for her new role this year.

I hope that you have found the articles published throughout 2022 to be both interesting and informative. The editors have appreciated the high quality of content contributed to the journal and we look forward to keeping you up to date with topical issues in the drug treatment of neurologic and psychiatric disorders in 2023.

With best wishes from the Editor of *CNS Drugs*.
Sue Pochon
