

## Acknowledgement to Referees

© Springer Nature Switzerland AG 2023

Dear Reader,

Welcome to the final issue of *CNS Drugs* for 2023.

I would like to reflect on this year's achievements and to thank all those who have contributed their valuable time and effort to the journal over the past 12 months.

I would like to start by thanking the authors of the articles published in *CNS Drugs* over the course of 2023. The skill and dedication of these experts is critical to the continued success of the journal.

The high quality of articles published in *CNS Drugs* has been reflected in the most recent Impact Factor of 6.0 and CiteScore of 10.5. These place the journal in the first quartile for Pharmacology and Pharmacy, Clinical Neurology and Psychiatry categories. Further, *CNS Drugs* has published content in a timely manner, with an average time from submission to acceptance of 114 days.

I gratefully acknowledge all of the members of the journal's Honorary Editorial Board, who have acted as peer reviewers and authors, and have provided guidance on journal content, policy and processes:

Through the hard work of our authors and reviewers, we continue to see great gains in article usage. The most popular 2023 articles to date, in terms of downloads from SpringerLink, were:

- [Long-Term Safety and Tolerability of Daridorexant in Patients with Insomnia Disorder](#)
- [Estimating Risk of Antidepressant Withdrawal from a Review of Published Data](#)
- [Extended-Release Viloxazine Compared with Atomoxetine for Attention Deficit Hyperactivity Disorder](#)
- [A Randomized, Open-Label, Multiple-Dose, Parallel-Arm, Pivotal Study to Evaluate the Safety, Tolerability, and Pharmacokinetics of Aripiprazole 2-Month Long-Acting Injectable in Adults with Schizophrenia or Bipolar I Disorder](#)
- [Treatment of Patients with Multiple Sclerosis Transitioning Between Relapsing and Progressive Disease](#)
- [Targeting Sigma Receptors for the Treatment of Neurodegenerative and Neurodevelopmental Disorders](#)
- [Ketamine and Zinc: Treatment of Anorexia Nervosa Via Dual NMDA Receptor Modulation](#)
- [Pharmacological Management of Borderline Personality Disorder and Common Comorbidities](#)
- [Daridorexant in Insomnia Disorder: A Profile of Its Use](#)
- [Immunoregulatory and/or Anti-inflammatory Agents for the Management of Core and Associated Symptoms in Individuals with Autism Spectrum Disorder: A Narrative Review of Randomized, Placebo-Controlled Trials](#)

Social media sharing and other online mentions of information are additional metrics with which to measure the reach of articles. This year the following articles published in *CNS Drugs* in the past 12 months have scored well on the Altmetric system:

- [Extended-Release Viloxazine Compared with Atomoxetine for Attention Deficit Hyperactivity Disorder](#)
- [Network Meta-analysis of Different Treatments for Vestibular Migraine](#)
- [Immunoregulatory and/or Anti-inflammatory Agents for the Management of Core and Associated Symptoms in Individuals with Autism Spectrum Disorder: A Narrative Review of Randomized, Placebo-Controlled Trials](#)
- [Calcitonin in the Treatment of Phantom Limb Pain: A Systematic Review](#)
- [Dextromethorphan-Bupropion for the Treatment of Depression: A Systematic Review of Efficacy and Safety in Clinical Trials](#)

I hope that you have found the articles published throughout 2023 to be both interesting and informative. The Section Editors and I have appreciated the high quality of content contributed to the journal and we look forward to keeping you up to date with topical issues in the drug treatment of neurologic and psychiatric disorders in 2024.

With best wishes from the Editor of *CNS Drugs*.
