Erratum to: Sports Med DOI 10.1007/s40279-016-0517-x

Section 1, paragraph 3, lines 3–8: The following sentence, which previously read:

“An inference that the population value is substantial, clinically important, real or otherwise non-trivial—when, in reality, it is trivial—represents a false-positive or so-called type I error, whereas a false negative or type II error occurs when a trivial true value is inferred to be non-trivial”.

should read:

“An inference that the population value is substantial, clinically important, real or otherwise non-trivial—when, in reality, it is trivial—represents a false-positive or so-called type I error, whereas a false negative or type II error occurs when a non-trivial true value is inferred to be trivial”.
