Stephan Ruscheweyh, the driving force behind the founding of *Computational Methods and Function Theory*, passed away on July 26, 2019. An obituary paying tribute to Stephan will appear in this Issue. A memorial volume of the journal will appear in 2020.

It is a privilege to welcome Pekka Koskela as the new co-chief editor of *Computational Methods and Function Theory*. Pekka Koskela has an outstanding research record in the core areas covered by *CMFT*, as well as years of editorial experience at several journals, including *Acta Mathematica*.

Joint Statement by Pekka Koskela and Doron Lubinsky

We are committed to the traditional goals of *CMFT*, namely to serve as an outlet for high quality research in complex function theory, in computational methods, and in related areas. The quadrennial conference will continue to be an important focus of *CMFT*. We intend to build on the foundations established by the founding editors, Stephan Ruscheweyh and Ed Saff.
