In the version of the article originally published, the information about the search strategy used for PubMed is missing the filter used. The information about this filter is described below:

For PubMed database, the following filter was applied:
“Child: 6–12 years; Adolescent: 13–18 years; Adult 19+ years”.

The use of this filter did not achieve one study which meets the inclusion criteria of the present systematic review and meta-analysis. However, it does not affect the conclusion of the present study.

Missing paper:

Gaikwad S, Gheware A, Kamatagi L. Dental caries and its relationship to malocclusion in permanent dentition among 12–15-year-old school going children. *J Int Oral Health*. 2014;6(5):27–30.

The original article can be found online at <https://doi.org/10.1007/s40368-018-0333-0>.
