Standard errors from the article by Shic et al. (2008) were incorrectly reported as standard deviations in Figures 4–6 and Fig. 9. The correct standard deviations and Cohen's *d* values are shown in the following table:

Table 1 Corrected standard deviations and Cohen's *d* values for Shic et al., 2008

	SD ASD	SD TD	<i>d</i>
Eyes/Fig. 4			
2-year-olds	1.67	1.94	−0.53
4-year-olds	1.25	1.14	0.92
Mouth/Fig. 5			
2-year-olds	0.52	1.18	0.58
4-year-olds	0.4	1.09	1.28
Face/Fig. 6			
2-year-olds	2.08	2.4	−0.35
4-year-olds	1.93	0.79	2.11
Screen/Fig. 9			
2-year-olds	2.08	2.4	−0.35
4-year-olds	1.93	0.79	2.11

With these corrections, the mean effect sizes for each AOI change slightly as shown in the table below:

Table 2 Overall effect sizes for each AOI including corrected values for Shic et al., 2008

	Overall effect size			
	Mean	SE	95% CI	
Eyes	0.38	0.08	0.21	0.55
Mouth	0.24	0.07	0.1	0.39
Face	0.45	0.11	0.25	0.66
Screen	0.64	0.15	0.35	0.93

None of these changes are significant, leaving the conclusions unchanged.
