The article, Investigation of High Temperature Performance and Viscosity Characteristics of Modified and Unmodified Color Asphalt, by C. Chen, H. Wu, and C. Zhang, was submitted and accepted for publication in a special issue on "Computations & Experiments on Dynamics of Complex Fluids and Structure." It was included in the April 2022 issue of *Experimental Techniques* due to an error in production. When the special issue is published, there will be a statement and reference to the previously published article.
