In the paper “Men's Expectations for Postconflict Reconciliation with Physically Strong Opponents” in Volume 9 (2023) on top of the second column on Page 182 in subsection “Displaying Respect”, authors have requested to modify the first sentence. The full subsection should be as follows:

Displaying Respect

A Target Strength main effect indicated that participants expected to display more respect to strong targets ($M = 5.69$, $SD = 2.31$) than weak targets ($M = 5.13$, $SD = 2.49$) ($b = .28$, $SE = .09$, $t = 3.20$, $p = .009$, $\beta = .12$, 95% CI β [.04, .19]). An Outcome main effect further indicated that participants expected to display more respect after a win ($M = 5.68$, $SD = 2.36$) than after a loss ($M = 5.14$, $SD = 2.44$) ($b = .27$, $SE = .04$, $t = 6.62$, $p < .001$, $\beta = .11$, 95% CI β [.08, .14]). Data are summarized in Fig. 4c. The interaction was again not significant ($b = -.06$, $p = .18$).

The original article has been corrected.
