The original version of this article unfortunately contain some mistakes in figure. The authors found that the curves

in Fig. 1f, g were missing.

The corrected version of Fig. 1 is given below:

Fig. 1 Fabrication and characterization of ultrathin 2D Nb₂C MXene NSs. **a, b** SEM images of Nb₂AlC ceramics with corresponding element mapping (Nb, Al and C). **c, d** SEM images of multilayered Nb₂C MXene and the corresponding element mapping (Nb, Al and C). **e** TEM image of one-layered or few-layered Nb₂C MXene NSs. **f** X-ray photoelectron spectroscopy (XPS) spectra of Nb₂AlC bulk and Nb₂C NSs. **g** Raman spectra of Nb₂AlC bulk and Nb₂C NSs. The scale bar in plane **a–c** equals 1 μm, and the bar of inset **a** and **c** represents 100 nm. The scale bar in plane **e** is 200 nm. (Color figure online)
