Correction to: Emission Control Science and Technology (2018) 4:172–197.
<https://doi.org/10.1007/s40825-018-0094-6>

The original article unfortunately has an error. The last 2 sentences in the 1st paragraph in the section “4.4.1 Dynamic and Total Capacities during Standard and Fast SCR” should be corrected as:

The total capacity refers to the NH₃ storage capacity in the absence of NO_x, while the dynamic capacity refers to the NH₃ storage capacity during SCR. The difference between these two gives the unused capacity.

Publisher's Note Springer Nature remains neutral with regard to jurisdictional claims in published maps and institutional affiliations.

The online version of the original article can be found at <https://doi.org/10.1007/s40825-018-0094-6>
