Correction to:
Journal of Medical and Biological Engineering
<https://doi.org/10.1007/s40846-021-00598-z>

In the original publication, there were errors in some sentences, Figure legends, and Tables that are corrected as below:

In the Abstract section, Results, Line 4: The “FSR” and “PSR” should be replaced with “fixed speed running” and “Preferred speed running”, respectively.

In the Introduction and Discussion sections: The corrected author name “Cunninghum” is “Cunningham”. Also, in the References section, the corrected author name “Bernstein” is “Bernstein”.

In the Results section, 2nd paragraph, the 1st Line: The “Table 4” should be replaced with “Table 4 and 5”.

In the Methods section, subheading 2.4 “Statistical Analysis”, Line 5: The number “3” before “PSW, PSR and FSR” is redundant and should be omitted.

In Table 4, The value of Trial main effect in repeated measure ANOVA results is missed and should be “0.89 (0.419)”.

In Tables 4 and 5, The group column containing “Control” and “PFP” should be separated from the column containing the “PSW” values.

In Figure 1, The legend should be corrected as “Line graph showing the significant group by trial interaction for coordination variability of trunk frontal-thigh frontal during stance; PFP patellofemoral pain PSW preferred speed walking, PSR preferred speed running, FSR fixed speed running”.

In Figure 1, last Line of legend: The sign ** for “group differences tended to be significant” should be replaced with * (underlined star).

In the Discussion section, 2nd paragraph: The last sentence “In the study by Hamill et al. ...” should be referenced as “[13]”.

In the Discussion section, 3rd paragraph: The last sentence should be corrected as follows: “The other couplings assessed in the study by Heiderscheit were between joints, not segments while in the present study all assessed couplings were intersegmental”.

The authors sincerely apologize for any inconvenience caused by these errors. The original article has been corrected.

The original article can be found online at <https://doi.org/10.1007/s40846-021-00598-z>.
