In issue #3, we have assembled again a couple of nice flow reviews and papers, which I hope you will enjoy as much as I did. Also in this issue, we have two new exciting Meet The Flow Chemist profiles: Profs. Amol Kulkarni (CSIR-National Chemical Laboratory in Pune, India) and Richard A. Bourne (University of Leeds, UK). Check out why they love flow chemistry and which papers they selected as their best.

Also, I would like to take a moment to share some excellent news with all of you. Our beloved journal got a new impact factor and it came with a blast. 3.622 (!) surpassed even our wildest predictions and we were beyond excited when the news came in. We have been growing in Impact Factor for a couple of years now and it is great to see this ongoing trend. We will do our utmost best to maintain the highest standards for publishing in Journal of Flow Chemistry. Off course, this would not be possible without the help from our authors, editors, readers, referees and other flow chemistry supporters. Thank you for your trust and continued support.

Also our twitter account (@JFlowChem) has received an increasing amount of followers: 572 individuals at the moment! We try to tweet regularly about new submissions,

special issues, and general flow chemistry information. In addition, we provide via this channel the most up-to-date information about the journal. So if you do not follow us yet, please do so to stay in touch!

I have also some exciting personal news for you. As you might have heard already, I will move up North and join the Van 't Hoff Institute for Molecular Sciences (HIMS) at the University of Amsterdam, where I will be promoted to Full Professor and be the chair of Flow Chemistry. So no worries, the Noël Research Group will keep a strong focus on flow chemistry!

I wish you all the best and I hope you all stay healthy in these challenging COVID times.
