In issue #4, we have gathered a nice collection of new flow work, which I hope you will enjoy as much as I did. Also in this issue, we have two new exciting Meet The Flow Chemist profiles: Prof. Francesca Paradisi (University of Bern, Switzerland) and Dr. Christian Hornung (FloWorks, CSIRO, Australia). Check out how they started doing flow chemistry and which papers they think are the highlights of their career so far.

Our twitter account (@JFlowChem) keeps receiving more followers: 624 individuals at the moment! Our social media strategy is really to share the best flow work, even across the boundaries of our journal. So if you want your work being

highlighted on our twitter feed, send a personal message to Tim.

I wish you all the best and I hope you all stay healthy in these challenging COVID times.
