The third year of Human Arenas (HA) has been difficult due to Covid-19 pandemic. At the end of 2020, the editorial team of HA would like to express our gratitude to all our reviewers around the world for their devotion of precious time and expertise to HA's development. Our reviewers' open mind, huge passion, and constructive suggestions have helped HA not only in assessing, inspiring, and cultivating innovative ideas but also in trying to open a creative interdisciplinary zone to reflect and understand the strong impacts of pandemic on human's lives. In the year of 2020, HA has published 69 articles in total and has been included in the journal list of Scopus database. Our huge progress would not be achieved without the help and support of our international reviewers. We sincerely acknowledge all the reviewer's generous contribution and look forward to further cooperation in the coming 2021 with same passion and vision in this special challenging time.
