In the section titled *On the Worth of Calculus for Calculus Per Se* in the original article, in the fourth paragraph the sum of the reciprocals squared [$\sum_{n=1}^{\infty} \frac{1}{n^2} = \frac{1}{1^2} + \frac{1}{2^2} + \frac{1}{3^2} + \dots$] should read as follows: Euler found an expression for the value of it – it is equal to $\frac{\pi^2}{6}$
