The editors have retracted this article after validating concerns that were raised on the interpretation of results and conclusion drawn. Post-publication peer review has revealed discrepancies in the experimental procedure i.e., tensile and tear tests, as the primary cause of flaws in the discussion section. Thus, the main claim of the paper cannot be reliably reached. All authors agree to this retraction. The online version of this article contains the full text of the retracted article as Supplementary Information.

**Supplementary Information** The online version of this article <https://doi.org/10.1007/s42464-021-00103-w> contains supplementary material, which is available to authorized users.

**Publisher's Note** Springer Nature remains neutral with regard to jurisdictional claims in published maps and institutional affiliations.
