<https://doi.org/10.1007/s42690-020-00378-3>

In the abstract of the above mentioned publication, an incorrect percentage is indicated for the month September and should read: September (1.00–2.00%).

The proper representation of the affected sentence is published here and should be treated as definitive:

Seed borer incidence commenced from September (1.00–2.00%) and the peak activity was reported during December (8.50 to 9.25%) at initial fruiting phase.
