In the original version of this article, the Acknowledgements section needs to be replaced with the below.

Acknowledgements Energy Safety Canada provided valuable information to this research project, and the participating companies were generous with both time and resources. This research would not have been possible without the involvement of the oil sands industry and regional contractors. We would also like to thank Ms. Julie Zettl for her significant contribution to the development of Tables 1–4 and for her assistance with site visits, data collection and analysis.
