Correction: Spine Deformity

<https://doi.org/10.1007/s43390-023-00705-x>

The original article has been corrected:

1 Affiliations

Details for authors Rajendra Sakhrekar and Mark Camp were incorrectly given twice as 'Division of Orthopaedic Surgery, The Hospital for Sick Children, University of Toronto, 555 University Avenue, Toronto, ON M5G 1X8, Canada' but should have been 'Division of Orthopaedic Surgery, The Hospital for Sick Children, University of Toronto, 555 University Avenue, Toronto, ON M5G 1X8, Canada' and 'Division of Orthopaedics, Department of Surgery, University of Toronto 149 College Street, Room 508-A Toronto, ON M5T 1P5, Canada'.

2 Abstract and Conclusion

The incorrect phrase "Although VNS manufacturer guidelines suggest that monopolar cautery should not be avoided" has been corrected to read "Although VNS manufacturer

guidelines suggest that monopolar cautery should be avoided".

The complete correct sentence reads:

Although VNS manufacturer guidelines suggest that monopolar cautery should be avoided, perioperative care providers should consider its selective use in high-risk instances (with greater risks of morbidity and mortality due to blood loss which outweigh the risk of surgical re-insertion of a VNS) such as cardiac or major orthopedic surgery.

3 Minor typographical corrections

Missing blank spaces between words have been added at several places in the text.
