There is an incorrect description of the IRR procedure for the literature inclusion / exclusion process within the article. On page 6 under the subheading "Interrater Reliability (IRR) Literature Inclusion", it currently reads "Percent agreement was calculated by dividing the total disagreements by the total agreements and multiplying by 100." Where it should read, "Percent agreement was calculated by dividing the total agreements by the total agreements plus disagreements and multiplying by 100."

Publisher's Note Springer Nature remains neutral with regard to jurisdictional claims in published maps and institutional affiliations.
