The ASMS office has moved to 1201 Don Diego Street, Santa Fe, NM 87501. Please note this new street address.

1995 RESEARCH AWARDS

The ASMS Research Awards are sponsored by Finnigan MAT and the ASMS Research Award Fund. The Research Awards are open to academic scientists within four years of joining the tenure track faculty of a North American university. Applicants may not have previously received an award under this program. The award is intended to promote academic research by young scientists in mass spectrometry.

Eligible applicants should submit a one page fiscal proposal and justification, a list of current research support, a three page proposal including references, figures, etc., a vita, and two letters of recommendation. The letters of recommendation will be held in confidence and may be sent by the writer directly to ASMS. Seven copies of the application materials, including all letters of recommendation, must be received in the ASMS office by November 30, 1994. Proposals are ranked on scientific merit and effectiveness of proposed use of funds.

Awards will be presented at the 1995 ASMS Conference. Recipients should expect to present the results of their award research at the 1996 Annual Conference. Each award of up to \$25,000 will be made to a university in the name of the selected individual and for his exclusive use. In accepting this award, the institution will agree not to charge overhead on the funds. The selection committee, which is secret, will consist of six scientists with a reasonable balance of organic, physical, biological, and instrumental interests. For further information contact the ASMS Research Awards, 1201 Don Diego Street, Santa Fe, NM 87501.

ASMS FALL WORKSHOP

The Fall Workshop will be October 28-29 in Philadelphia, PA. The topic will be Good Laboratory Practice. The program will be organized by Robert K. Boyd, National Research Council, Halifax, Canada, and Jack D. Henion, College of Veterinary Medicine at Cornell University, Ithaca, NY.

THE 7TH SANIBEL CONFERENCE

The Sanibel Conference will be January 21-24, 1995, and will return to its traditional site at the Sundial Beach Resort, Sanibel Island, FL. The conference will focus on the physics and chemistry of electrospray and the formation of multiple charged ions. The conference will begin Saturday with a reception and poster session and conclude midday on Tuesday. The program will involve 20 invited speakers and contributed posters in the area of electrospray and multiple charged ions, covering mechanisms, novel instrumentation, structural determination, sequencing, and applications.

Contributed posters in these areas are invited and will be highlighted in the evening sessions. The Sanibel Conference is organized by Robert D. Voyksner and Paul Kebarle. Registration will be limited to the first 125 registrations received. For additional information, contact ASMS, Judith A. Sjöberg, Executive Director, 1201 Don Diego Street, Santa Fe, NM 87501. Telephone: (505) 989-4517.
