## Obituary

It is with great sadness that we report the passing away of Lee Segel on 31st January 2005. Lee was one of the founding fathers of Mathematical Biology and made seminal contributions in several areas in the field. He was Editor of the Bulletin of Mathematical Biology from 1986 to 2002. He was a very supportive colleague and friend to the Mathematical Biology community and will be sorely missed. We will publish a special issue in the future to commemorate his contribution.

Philip K. Maini
