

Editorial

Following the journal receiving a NLM positive decision and the subsequent PubMed citation status, there has been a marked increase in the number of submitted manuscripts with a resultant increase in the number of accepted submissions.

To minimize the delay between acceptance and publication of the manuscript the journal issue size has increased, being 100 pages for the last issue and 155 pages for this issue. If this trend continues the number of issues/year will possibly increase next year.

The additional Editorial from Dr. David Clements explains the CME opportunity with selected articles in Journal, which are now indicated as such in the Table of Contents and the CME page can be accessed at <http://www.spine-deformity.org/cme/home>.

I encourage you to take this opportunity to obtain CME credits as you read the journal.
