Partitioning linear trends in age-adjusted rates (*Cancer Causes and Control* 11: 31–35, 2000)

Hankey BF, Ries A, Kozavy CL, Feuer EJ, Merrill RM, Clegg LX & Edwards BK

The percentages for females on page 33, second column, second paragraph, should agree with Table 1, *i.e.*, the percent for breast cancer should be 47.9, for cancer of the colon/rectum 23.7, and for ovarian cancer 9.6. The pie chart for females in Figure 1 should also agree with Table 1.
