Axilla surgery severely affects quality of life: results of a 5-year prospective study in breast cancer patients

Jutta Engel¹, Jacqueline Kerr¹, Anne Schlesinger-Raab¹, Hansjörg Sauer², and Dieter Hölzel¹

¹*Munich Field Study, Munich Cancer Registry,* ²*Med. Klinik III, Klinikum Großhadern, Ludwig-Maximilians-University, Munich, Germany*

Breast Cancer Research and Treatment **79**: 47–57, 2003

The values for ‘Negative’ and ‘Positive’ under ‘Lymph nodes’ in Table 1 (p. 49) of the original were presented the wrong way around. The right values are given below.

Negative 583 (60.0)

Positive 323 (33.2)
