

**Corrections to
“Necessary conditions for the convergence
of Lebesgue–Fourier series”**

PREM CHANDRA

There are some minor errors in the statements of Theorems 2 or 2' and 3, which may be corrected as follows:

Page 172: Read “is strict, whenever $P(t) \in BV(0, \delta)$.” in line 3 from bottom.

Page 173: (i) Read “series of $f \in L$ at a point x , whenever $P(t) \in BV(0, \delta)$, is that” in line 2 from above.

(ii) Read “series of $f \in L$ at a point x , whenever $f \in BV(P_1)$, is that (1.10) hold. However, (1.10) alone is” in line 12 from above.

Page 178: Read “3.3. Proof of Theorem 3. Let $f \in C(f)$ and let” in lines 13 and 14 from above.
