Errata

The Publisher regrets that the following errors were made in Volume 10, Number 5 of *Ecotoxicology*:

In the article, "*Use of a Simulated Gizzard to Measure Bioavailability of Metals and Other Elements to Waterfowl*" by Levengood and Skowron, the units for the detection limits of elements in seed samples reported in the first paragraph of the Results Section are incorrectly specified in some instances. All units should have been reported as micrograms

(of each element detected) per gram (for all seed sample analyzed).

In the article, "*Preliminary Assessment of Perchlorate in Ecological Receptors at the Longhorn Army Ammunition Plant (LHAAP), Karnack, Texas*" by P.N. Smith, et al., it should be noted that all values of perchlorate concentrations recorded in Table 1 are reported as wet weights unless otherwise stated.
