

## ERRATUM

In the paper by Yu. K. Zaretskii entitled “Provision for slope and embankment stability (Osnovaniya, Fundamenty i Mekhanika Gruntov, No. 6, 2001), the text on page 5 dealing with determination of the safety factor should read

$$K_s = \dot{U} / \dot{L},$$

where  $\dot{U}$  is the rate of plastic energy dissipation, and  $\dot{L}$  is the power of the external forces.
